RE: Final Third Phase Chesapeake Bay Total Maximum Daily Load (TMDL) Action Plan Review,
Virginia Peninsula Community College, VAR040087

Dear Mr. Mason:

The Virginia Department of Environmental Quality (DEQ) has performed a review of Virginia Peninsula Community College's final third phase Chesapeake Bay TMDL Action Plan (TMDL Action Plan), dated September 2024. This review evaluated the TMDL Action Plan for completeness, technical accuracy, and whether any further information was necessary to demonstrate that the 100% required reductions will be achieved by October 31, 2028, as specified in Part II.A. of the General Virginia Pollutant Discharge Elimination System Permit for Discharges of Stormwater from Small Municipal Separate Storm Sewer Systems (MS4 General Permit).

Based on this review, the TMDL Action Plan satisfied the requirements specified in Part II.A. of the MS4 General Permit, and no further information is requested at this time. Please continue to update the TMDL Action Plan as needed. The review of the TMDL Action Plan is not meant to be a comprehensive review of the MS4 program or overall implementation of the Chesapeake Bay TMDL Special Condition in the MS4 General Permit.

Thank you for your continued efforts in implementing the MS4 General Permit and the TMDL Action Plan. If we can be of any assistance, please contact me using the information below, or contact your Regional Office MS4 Coordinator.

Sincerely,

A handwritten signature in black ink that reads "David A. Taylor". The signature is written in a cursive style with a large initial "D".
